Pam has been pondering over what kind of computer to buy. She is a student who is on the go a lot and would like to have a computer she can take to class to type notes on while she listens to the teacher lecture. She does not have a great deal of money and will mostly use a computer for Office programs such as Word and PowerPoint. She will definitely want to use the Internet with her computer and maybe use it to store the many songs she has. Which computer would be her best choice and why?
