

Spreadsheet Assignment #6

Keeping Track of Stock Prices

The stock market is an exchange where investors can buy or sell shares of stock or “ownership” in a company. Corporations sell stock to gain capital, or money that the company will use. Money is made or lost in the stock market by buying the stock at a certain price and selling at another price. You would obviously want your stock price to increase so you can sell at a higher price and make money.

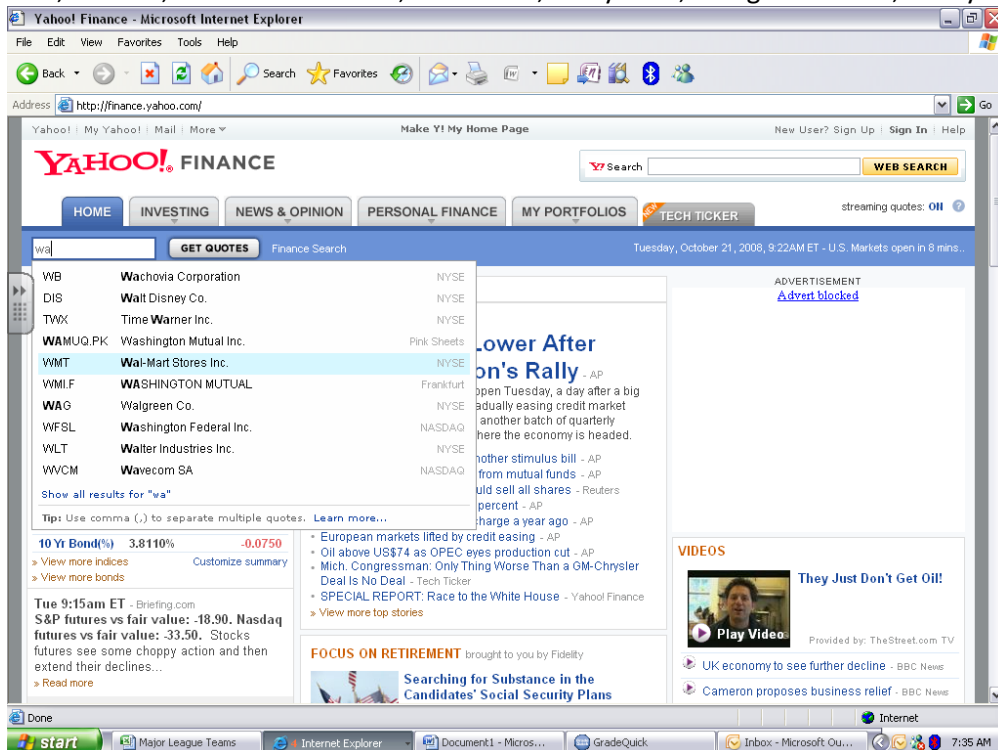

Today we are going to do an assignment on keeping track of stock prices. You will need to look up the historical closing prices on a company and make a line chart using spreadsheet software. Follow the steps below to complete the assignment.

Step 1: Choosing and looking up a company of your choice

You will need to pick a corporation that is publically traded on the New York Stock Exchange (NYSE). You will then go to www.finance.yahoo.com and look up the stock quote. To do this, begin typing in the company name and a list should come up that lists that company. (Note: Not all companies are publically traded & some companies are owned by a larger company & traded under that name. Example- Taco Bell is owned by YUM! Brands and traded under YUM.)

Company suggestions:

Target- TGT; Ford- F; McDonald’s- MCD; Nike- NKE; Sony- SNE; Walgreen- WAG; Macy’s- M

Step 2: Looking up the Historical Prices

You will now need to look up the past closing prices for the entire month of last month (August).

2-Oct-08	59.66	59.85	58.23	58.85	21,199,900	58.85
1-Oct-08	59.51	60.30	58.99	59.66	23,363,700	59.66
30-Sep-08	59.18	60.01	57.74	59.89	26,925,700	59.89
29-Sep-08	60.05	60.85	58.27	58.45	27,535,200	58.45
26-Sep-08	59.09	60.00	58.09	59.71	21,199,900	59.71

Step 3: Record the Closing Prices in your spreadsheet.

Now you will need to make a chart showing the closing Prices for September.

Step 4: Make a line chart.

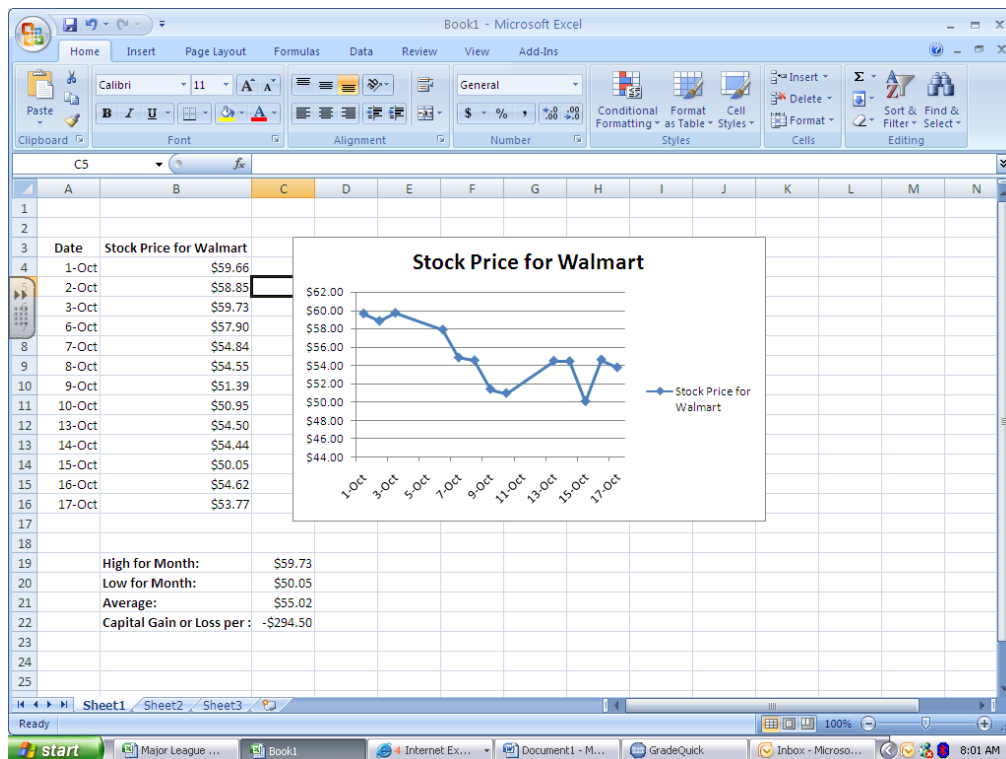

You will make a line graph that should show the upward or downward trend of the stock over the past month.

Step 5: Other stock analysis

Now you will find some other numbers from the information you have. Somewhere on your spreadsheet you need to show the following:

1. Stock Price High for the month
2. Stock Price Low for the month
3. Average for the month
4. Capital gain or loss for 50 shares of stock
(stock paid for on last date – stock price on first date) x 50

Your spreadsheet should look like this below when finished:
