Mr. Minger,

I love the way you have your Middle School computer classes set up. I teach grades 6, 7, and 8 at Ocoee Middle School in Cleveland, TN.. I have been wanting to set my classes up like this for years. I just didn't know exactly how to do it. The way you have it works just like our school is set up. Until this year, I have just been teaching keyboarding in every class. Some students would have to do the same thing for three years. So, this year I started out trying to have different assignments for my 8th graders. And this led me to your website. Do you mind if I use your lessons in my classes?

Thank you so much.

Theresa Calfee
